

Automating Information Capture and Distribution

Change for the better... EVOLVE.

Business information is evolving.

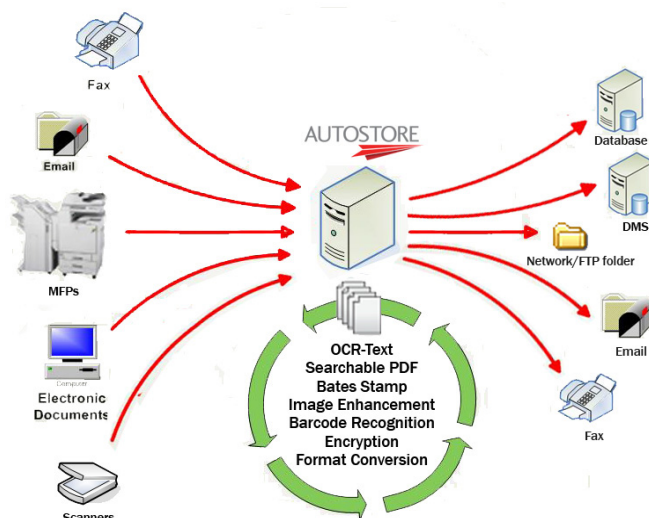

Today information needs to move at network speed and paper only slows it down. Now you can easily turn paper-bound information into lightning-fast digital data with the push of a button. Share it, send it, use it in your favorite business applications, store it, search it—and make it work harder for you.

AUTOSTORE™ software gives you the power to streamline and optimize your processing. Forget manual processing of documents. AUTOSTORE lets you classify documents, extract just the data you need, and deliver it wherever you want.

AUTOSTORE works seamlessly with your existing network, equipment and information technology, making it more powerful. You'll spend less time handling paper and more time using your valuable data to do business. Save time. Money. And paper.

Key features

- Capture electronic content from virtually any source (email, desktop, network folders, SFTP folders, MS Office applications, XML data streams, and more)
- Capture paper documents from scanner, MFPs, and copiers of leading manufacturers
- Index paper & electronic documents before storage
- Scan once and deliver to multiple destinations
- Personal workflows with network authentication
- Secure capture & delivery from SFTP sites along with document encryption
- Convert scanned documents into various formats (searchable PDF, WORD, EXCEL, etc.)
- Perform PDF file size reduction
- Enhance image quality with over 2 dozen filters
- Read barcodes, hand writing, and OMR and use as index data
- Perform Bates numbering of documents
- Advanced forms processing modules for structured and unstructured forms
- Optimize workflows as dynamics of your business change
- Open SDK supporting C++, C#, VB.Net, VB, and Jscript

Capture content from:

- Xerox
 - Ricoh , Lanier, Gestetner, Savin
 - Kyocera
 - HP
 - Sharp
 - TWAIN Scanners
 - Email (SMTP, Exchange, POP3)
 - Fax
 - Local or remote folders
 - FTP sites (secure & unsecure)
 - Files (batch, XML, text, delimited formats, ASCII)
 - PC desktop
 - MS Office applications
- And more...

Productivity...Efficiency...Compliance...

- Lower paper storage and retrieval expenses.
- Reduce the cost and error associated with manual data entry.
- Get immediate access to stored information.
- Work with data regardless of its source or format.
- Capture critical data at multiple locations.
- Send to Email with Exchange (Sent folder populated)
- Capture Meta-Data and image in XML for entry level document management
- Automatically split scan jobs
- Ensure compliance through auditing and tracking

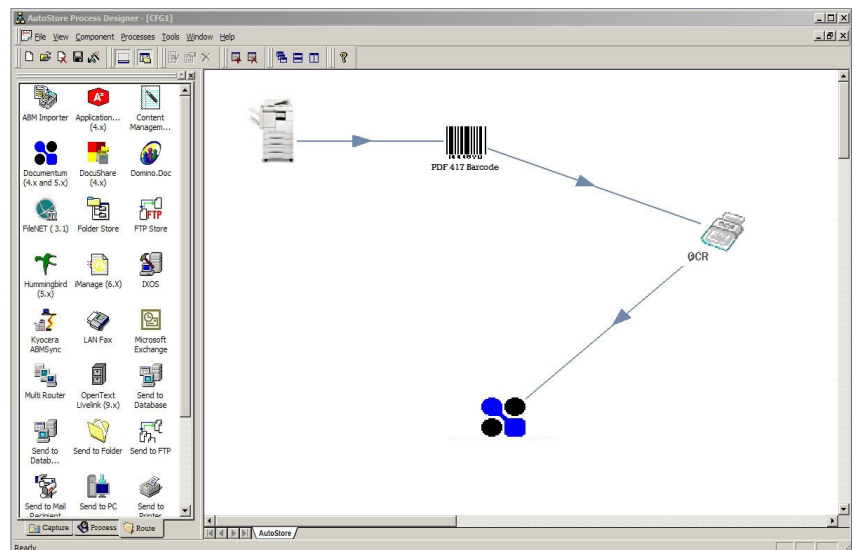

Destinations and repositories:

- Fax Servers
- eMail Servers
- Secure FTP sites
- ODBC-compliant databases
- Folders
- PCs
- Printers
- LaserFiche
- Lotus Notes/Domino
- Summation, Concordance, IPRO
- Microsoft Exchange
- OpenText Livelihood
- SharePoint 2003, 2007
- TRIM Context
- And More...

Repositories:

- ApplicationXtender
- Documentum
- DocuShare
- Domino.Doc
- FileMagic
- FileNet
- Fortis
- Hummingbird
- Interwoven
- IBM CM8

AUTOSTORE is a dream product for IT administrators. They can use the AutoStore Workflow Process Designer to easily deploy most complex capture workflows with in minutes.

Instant benefits for business.

- Increase ROI
- Instant access to content
- Improve efficiency
- Boost security with audit trail
- Increase control with centrally managed workflows

More power to you!

- Reduce document handling expenses by capturing information from any source
- Eliminate document loss by transforming paper documents instantly
- Seamless integration with leading MFP manufacturers devices
- Find and retrieve documents quickly with better indexing
- Improve document quality and convert into multiple formats
- Reduce manual labor & time with best of breed recognition and extraction
- Boost information security with encryption, user authentication and creating an audit trail

- Increase efficiency & security with MFP front panel personalization
- Receive notification upon delivery of content to the destination
- Optimize efficiency with user/device activity reports or repository access metrics

Additional document services

•Stamping

Promotes compliance and consistency in managing content within the enterprise. Uniquely identify pages and volumes of documents by using AutoStore stamping features. Now documents are stamped at the point of capture with configurable stamps that match your enterprise needs.

•Forms Processing

Improve ROI, get early payment discounts with automated invoicing modules of AutoStore. Setup workflows to classify documents, read and extract valuable information from structured or unstructured forms, and provide integration with financial applications.

•Customization

The sky is the limit with open SDK supporting C++, C#, VB.Net, VB, and Jscript. You can create custom integration with full XML mapping. In addition based on business rules AutoStore supports device, client, server, and field level scripting.
