Net FYI, a woman owned 8(a) company, is a full service, information technology consulting company specializing in computer consulting, programming, development and support for large, complex information and communication systems. Since inception in 1996, our work excellences take us from application development to research and development, web applications, enterprise collaboration, network administration, and systems analysis. Our clients, both private and government, are testimonials to the excellence in our work and our dedication to being the best. The Principals and Associates of the firm each bring more than 15 years of experience as IT consultants to a range of clients in the communications, financial, health, defense, manpower and large government contracts – as well as working with small commercial IT firms. Our professional staff is experienced working with clients in both the private and public sectors.

## **Experiences**

Present and past clients served by the firm's professional staff include:

- National Government Agency (NIH, DOE, etc.)
- Major Telecommunications Company
- National Defense Center
- Multi-National Finance Institution
- International Implement Manufacturer
- Major Pharmaceutical Company
- Principal Federal Statistical Agency
- International Consulting Firm

## **Key Services**

Collaboration System/Business Workflows

- IBM Domino/Lotus Notes database design, administration.
- IBM Domino/Lotus Notes website design and development.
- IBM Domino/Lotus Notes network and security administration.

Electronic Document Management Solutions (EDMS)

- Design and develop customized document imaging solution that turns paper documents into searchable electronic repository or web-enabled searchable engine via simplified one-touch process. The simple design solution is used to solve complex paper problem and it can be customized and used for fax, scanned, or electronic documents. For demo see: <http://www.netfyi.com/edmsdemo>.
- Integrated solution using OCR and NSi's Autocapture technology that takes paper or electronic documents from distributed locations, index, and store them into a central repository server.
